In SUPRA, the letters corresponding to a complete version of the Spanish alphabet (with the ch as it used to be a few years ago as well as an additional double r) are as follows:

1	1 = A	÷	17 = Ñ	×	8
2	2 = B	⊙	15 18 = O	∩	9
3	3 = C	⊙	16 19 = P	×	1

33 = (6)

According to their order in this 30 letter alphabet each letter corresponds to a numerical value. Using this numerical values the numerology of names, places, license plates, etc, etc can be done by utilizing the numerical meanings in SUPRA. In this process more is involved, such as dividing the number that corresponds to a person's name by 9 in order to find his or her divine number or as subtracting the alpha or first number from the omega or last number in a series for other purposes.

Rough Draft Info Sheet
by Giorgio PIACENZA

José María Fernandez was born in a district of Habana called Marianao which in Portuguese "coincidentally" means "Mary's Ship". He was born on November 2nd, 1954, 23 days after his identical twin brother who still lives in Cuba. José tells us that throughout his life he had many strange happenings such as experiencing the conversion of mud into little pieces of chocolate when he was playing as a kid with other small boys. He also relates how he heard a voice that told him to urgently move out with his family from his house on a hill called Mameyes outside of the City of Ponce. After some stubborn resistance to the voice he and his family left and a few minutes later a landslide killed hundreds downhill.

José has been living in Puerto Rico since 1980 and has been a fisherman for a long time. He claims to have been a rebel or adventurer all of his life and this cost him some jail time in Cuba because of his continuous search for self expression and freedom. In the 80's he joined several churches and was very militant as a born again christian evangelist until he grew dissilussioned with the hypocrisy within these groups.

In October of 91' José went out to his backyard in a new house in Ponce, facing the ocean and shouting demanded that God proved his existence to him. He continuously challenged God out loud all night long and the following day went out to dive with a friend. That day while he was chasing what appeared to be a small shark in order to film it with his underwater camera, the animal all of a sudden caught him off guard and bit him in the ankle pulling him down into the depths. For about ten minutes he struggled and his friends thought he was dead but something made him shoot at the shark into its head in the middle of a cloud of blood. Miraculously, one of his friends had also tried to shoot at the shark and his arpoon barely missed him.

Back at home José realized that he had a very bad wound with his ankle tendons hanging out. The condition didn't improve when after he was mended at the hospital he had to go into the ocean and try to recuperate his own boat that had gotten loose

with the high tides while he was at the hospital. Even though José tried to protect his ankle with plastic before getting into the water, the wound filled up with sand and soon after it seemed as though he would have to lose part of his leg because of the infection and swelling.

That night, on October the 4th, 1991, he went out again into his house's backyard and demanded God's attention once again. His wife notified him that two days before a UFO had been seen a short distance away hovering above the Hotel Piazza and José rejected the idea as outlandish wishful thinking.

To his surprise, later on that same night, some strange lights that began to move in the horizon came close and with a pulsation and strong harsh sound startled José who clearly announced what was transpiring outside of the house while he rushed inside hopping in one to search for his video camera.

He filmed as much of this event as he could and then woke up the following morning out in his backyard to discover that his female dog had recuperated the eye that she had lost because of an accident. José then began to curse God and the ET's for preferring to heal an animal instead of a human being until his wife interjected by saying "having you noticed that now you are running around on your feet?".

This is how José M. Fernandez began a continuous series of direct physical contacts with different ET beings. People began to gather in his house every evening because the space ships continued to move about in the horizon and José was filming them almost on a daily basis while connecting his video recorder to the TV in the living room.

José has been witnessed ascending into the air taken by UFO's on several occasions. He also met other contacts that had encounters with him in Puerto Rico. José was taken to intramarine subterranean worlds under the Bermuda Triangle in the largest ECO base of our planet. There he met Morloffs (Big Foot) that accompany Ashtars (beings with an evolution beyond normal ET's), as well as beings from Orion, Venus, Mars and Ganymede. He has travelled to the underground worlds where many of these beings come from and has been taken to the Central Sun system of Sirius A, B, and C with its four moons. He tells us that until now (March, 1997) he has been physically taken 21 times because of his desire to cooperate with a large mission of importance for all the world. José was gradually trained and prepared to sustain contacts consciously since in the beginning there were contacts without full conscious control of his faculties.

There are other persons that write in Supra in Puerto Rico. I interviewed a man that went on board the spaceships on more than one occasion with José. Seven pyramids have been built around the island according to instructions from the "extraterrestrials" and the ashtars and they actually seem to have played an important role in deviating some hurricanes away from Puerto Rico. Also, an infertile couple (that I interviewed) was blessed with six pregnancies at once (the case became famous in PR) after the lady was impregnated by "balls of light" as they say while spending three nights inside one of the pyramids.

The mission now, according to José is to awaken people to build "arks" or pyramid complexes for evacuation, contact and communication because the times of the cleansing are upon us and the beings that work for the Creator in this process cannot "garantee 100% safety in rescuing people outside of these arks".

José tells us that master Jesus will be walking over the surface of the Earth on July 3rd, 1999 and that there's no time to wait. He will be coming out of the 55th level inside the Valley of the Eco commanding the ET's under his jurisdiction that are to be considered "angels of judgement".

A polaroid photo of a venusian spaceship was analyzed by Mr. Donald Selwin who is an engineer and image producing expert that regularly works for NASA under contract. As a serious scientist he produced a report where he states that the picture truly seems to depict a real three dimensional object that produces energy fields and is suspended in midair regardless of its dimensions. According to José, this photo is of the spaceship where his closest ET ashtar level commander (called SAHARA) travels. Sahara is supposed to come from Venus but originates somewhere in the constellation Emu or The Emu and now also works closely associated with the Virgin Mary in the Valley of the Eco in the so called Bermuda Triangle.

Another polaroid picture showing a clear image of an Orion defense spacecraft was analyzed by Mr. Mario Torres from Mexico who works for Jaime Maussan and for the UFO magazine "Contacto OVNI". He is a physicist that has developed new analytical techniques and also validates this UFO picture by José M. Fernandez.

SOME NUMERICAL MEANINGS IN SUPRA

Each number also represents a sun and a solar council.

1. Number one represents Sirius A in the Central Sun complex. First things. The Source of the Supra knowledge and other numerologies. The pegasus horse and all the other horses, mules, zebras, donkeys are linked to 1 and Sirius A. The Central Sun complex has four moons that represent the four directions or cardinal points and protect this source. The Central Sun Sirius A is the positive divine in this three star and four moon Central Sun complex. It is felt in the right hand. The star Sirius B can be requested to destroy certain things if we know certain codes. This star Sirius B can be felt in the left hand. Sirius A is the day and Sirius B is the night. Then there's the star in the middle of Sirius A and B and it is the star Sirius C, the dog star or "can" in Spanish. It is the central force of all and the most central of these suns.

2. The elementals and the butterfly. The elementals are the first creations and are closest to the Creator in the Central Sun. They look like midgets and José is not referring to the astral or etheric entities that are known to keep plants and natural environments going although perhaps there may be a relation. Apart from the butterflies, other fragile things with wings represent this number 2, sun and solar council. This number also represents faithfulness since the elementals are faithful to the Father or the Creator. José says that this number has to do with the angels and that the angels live in the suns. The supra beings can do as they please with their bodies and according to their evolution can reach beyond the 11th or 13th dimensions. Number 2 also just represents twice of something.

3. Everything that is related to the marine kingdom. Men or women related to the sea. Not the marine kingdom itself.

4. Everything that has to do with twin souls and with twin spirits (they are not the same). Also, the 4th key or code is of the Virgin Mary, the universal queen for the Blue Planet (planet Earth). She is Jesus' twin soul. All the virgins work with this 4th key. This key also has to do with the solar council of 22, also known as the council of Jesus and Mary.

Confidential

4. 411 is a warning or a notice that something is going to happen. It is not a warning of impending disaster like 711 but mostly a call to be attentive about something.
5. Number 5 represents holiness or saintliness. It belongs to Horus, the Universal King of Mars or Great God from Mars. That which has to do with holiness enters through Horus. Jesus is physically in level 55 of the Valley of the Eco. He had been expelled by Earth's humanity some 2,000 years ago and underwent training and further learning in the councils 22 and 24 as well as in Orion where he toughened up for his return to Earth in order to assume his role of Universal King for the planet and to judge the living and the dead.
6. Represents pure evil and also the lower astral. This meaning can change depending what numbers accompany it. For example, 613 is Elijah's code and Elijah is like the supreme chief of tactical operations of the Universe as well as an original creation of God like an elemental. Jesus was ascended into the heavens by Elijah who also had been a biblical figure.
The races of beings with bodies but no souls are known as the 1206 race or corrupt race.
Number 6 is the opposite in direction to number 9 which is divine. Number 6 and its presentations come from the SOUTH.
7. Seven means POWER, either good or bad. What other number accompanies 7 qualifies it as a good or an evil type of power.
8. SPIRIT. The number that accompanies it qualifies it as a good spirit or a bad spirit.
9. DIVINE. Also, what is represented as divine is in Sirius A. (Sirius C represents the Great Dog and the elementals).
The councils of 22 and of 24 in the 22nd and 24th suns are supported by the high councils of 22 and of 24 in the Central Sun system.
Letter H, the 9th letter in Spanish is unpronounceable.

9. When Jesus left the Earth some 2,000 years ago at age 36, he was protected by the High Council of 24 and learned more things. Later, he descended to the High Council of 22 in order to learn about the evil of the Earth and during this learning period he received the warrior side he now possesses.

Mother Mary, our universal queen is in charge of 11,000 virgins as well as other small angelic creatures that help her.

Jesus has 11,000 warriors or angels of judgement like Michael that help him. All of them are Ashtars. The extraterrenials also help and after Jesus they are all moved by Elijah who is responsible before the higher councils.

Number 9 and truly divine apparitions come from the NORTH with their faces towards the south, unless they are holographic projections.

0. The Earth plane, meaning the surface of the Earth. This is the blue planet and the material that covers the dry surfaces of the planet was brought from many different places of the Universe. Water covered everything else before. Dryland is an addition and not as basic as the rest of the planet. There's life inside the Earth, in our Mother's womb. We who live outside our mother's womb are the only extraterrestrials. Beings from other planets also live inside those planets, therefore it would be better to call them extraterrenials rather than extraterrestrials.

10. Angel.

11. Refers to the Command of Jesus & Mary.

12. Corrupted.

12:60 is the common frequency under which humans on Earth operate. The normal astral regions (Astral A) also operate under this frequency.

12:06 is the frequency of the corrupt race of intra-terrestrial beings with bodies but no souls that live in the first six levels under the surface of the Earth in southwestern portions of land.

If number twelve is accompanied by another twelve as in 12:12, it represents the council of 24. This council has 12 males and 12 females. Number 12 can also be qualified differently if accompanied by other numbers. For example, 912 refers to an area on the Earth.

13. Presences or apparitions.
14. The lower astral.
15. The Central Sun of the Universe and is = to GOD. On the Earth it represents the wolf and all the other dogs or dog like creatures.
16. Before an event or expectation period before an event.
17. Lazarus, an elder in the council of 24. Also, the MOON
18. The intramarine kingdom where Jesus is now. This can also be considered all the oceans that are connected and compose a single ocean kingdom.
19. Everything that has to do with the womb or with the birth of someone. 19 is also a number that belongs to Ganesh. The son of Shiva represents a number 9 on his head, a number 19 on his belly and a number 29 on his feet. He is the only one that carries the three divine numbers.
20. Incomplete frequency or the complement of a frequency.
21. WISDOM, either from a good or a bad source, depending on what accompanies or qualifies this number.
22. The Council of Jesus and Mary. Frogs come from this place. Frogs are sweet in nature. If one puts salt in them they die.
23. Differences.
24. The council of 24 elders that assist Jesus and Mary. Some of these elders are Morya, Lazarus, Elijah and Joseph. It can also be said that this is a council of Jesus and Mary. From this council the information comes down to the Council of 22. There are 12 male and 12 female elders in the Council of 24 and in the arks there have to be 12 men arks and 12 women arks. The dove and the eagle represent the Council of 24. The white dove in particular represents the Holy Spirit.

- 25. Predictions.
- 26. Complement of the SK institution.
- 27. Other codes to be learned in due time.
- 28. Demons.
- 29. A Ganesha number. Ganesha is known as the remover of obstacles. This number also represents the rat.
- 30. Crustaceans.
- 33. Represents OMEGA, the last thing. Also Jesus.
- 40. Priesthood or priest.
- 42. Key.
- 43. Seventh key.
- 44. Has to do with the 4th key.
- 45. The USA which is also known as "the bleeding mouth". It has to do with 45 degrees of north latitude.

There are other codes. For now this knowledge will suffice. José flew past one million and four suns before being taken to the Central Sun.

IN SUPRA THE NUMBERS ARE REPRESENTED AS THE FOLLOWING:

1		6	
2		7	
3		8	
4		9	
5		0	

If a series of numbers descends, like in 87, the information they are bringing is coming from the normal or the lower astral regions (or from astral A or B). This is so unless the series is qualified by a number like 5 which signifies "holy" or by 9 which signifies "divine". According to José there can be good information coming from the astral A but since all the astral is also contaminated this can be a short lived good source and one has to learn to secure a good channel of communication by utilizing the Supra language and numbers that is the means of communication in the Supra level of being.

Teachings about the holy rosary:

According to José, the holy virgin of the Rosary explained to him some of the secrets behind the meaning of the rosary. There are 5 cycles of ten hail Mary's (5=holy, 10=angel) plus one count for the "Glory be to the Father..." which adds up to 11 beads per cycle. Therefore, 11 times 5 gives 55. The first cycle adds up to 11, the second accumulates to 22 (the council of 22), the third one accumulates to 33 (Jesus' number) and the fourth one accumulates to 44 (a 4th key). The number 11 in each cycle also represents the 11,000 virgins that help mother Mary. All of this makes of the rosary a sacred and powerful tool for linking with the good universal forces in a sacred way.

The alpha and omega numbers in a year, say, 1996, give the meaning of a certain TIME period. For example, in this case 1 and 6 would give 16 which means expectation period. Perhaps then, 1996 was in essence a period of expectation before the great revelations that would take place thereafter.

A good way to synchronize even further with the universal frequency 13:20 would be to acquire a digital watch and at precisely 12.00 midnight set it as though it were 11.11 AM. Then, this watch would be used to identify happenings with the understanding that there are no casualties or simple coincidences, but that every event is meaningfully connected to each other and that everything is synchronized by the frequency 13:20. In this way we begin to function more aware with the part of the subconscious that is linked to every synchronistic and spiritually meaningful event and we'll begin to be more in tune like our cosmic friends. For all of this we need to begin utilizing the numerical meanings of Supra.

In SUPRA, the letters corresponding to a complete version of the Spanish alphabet (with the ch as it used to be a few years ago as well as an additional double r) are as follows:

1	1 = A	÷	17 = Ñ	× 8
2	2 = B	⊙	15 18 = O	∩ 9
3	3 = C	⊙	16 19 = P	× 1

13	15 = M	× 6		
14	16 = N	× 7		

3.3

33 = (6)

According to their order in this 30 letter alphabet each letter corresponds to a numerical value. Using this numerical values the numerology of names, places, license plates, etc, etc can be done by utilizing the numerical meanings in SUPRA. In this process more is involved, such as dividing the number that corresponds to a person's name by 9 in order to find his or her divine number or as subtracting the alpha or first number from the omega or last number in a series for other purposes.
